WORK EXPERIENCE

Torc Robotics

2026 – Present

Vehicle Reliability Manager

Fort Worth, Texas

- Led and trained a small team of exceptional Truck Operational Specialists. They learned to troubleshoot Linux operating systems, networking, and remote access as they relate to autonomous trucks. Taught them to document processes such that the knowledge can spread to a wider audience.
- Reported on persistent issues impacting operations at the site as it relates to autonomous vehicles. Following up and encouraging delivery on high value bug tickets, as well as following up with additional information for resolution as required.
- Trained site on testing best practices, troubleshooting best practices, and drove standardization and documentation of standard operating procedures.

Torc Robotics

2024 – 2026

Quality / Safety Engineer

Fort Worth, Texas

- Led execution and reporting for complex, high-value closed-course autonomous vehicle tests, including participant direction, safety briefings, real-time event coordination, and post-test documentation
- Led critical demo and field operations, supporting high-visibility demos and enabling successful investor and partner engagements under tight timelines.
- Served as a cross-functional technical leader by reporting and troubleshooting fleet-wide issues such as VPN failures, canister mismatches, and lidar calibration problems. Coordinating hardware fixes and improving testing safety and efficiency.

Torc Robotics

2022 – 2024

Operational Specialist / Fleet Operations Support

Albuquerque, New Mexico

- Supported high-visibility demos and testing for partners through primary and backup truck support, ensuring smooth operations and reliable data collection.
- Provided critical technical feedback to engineering teams to improve tools, resolve issues, and strengthen operational readiness.
- Improved operational reliability and team performance through weekly operational support, operations manager cross-training, and mentorship of new Operational Specialists on tools, workflows, and system setup.

Templeton Transportation

2018 – 2022

Hazardous Materials Driver

Albuquerque, New Mexico

- Transported hazardous materials safely and in compliance with applicable regulations while ensuring accurate order completion, timely delivery, and valid insurance and permits.

EDUCATION

Central New Mexico Community College

May, 2018

Associates Degree of Applied Sciences

Albuquerque, New Mexico
